

BLUETOOTH HANDS-FREE CAR KIT 1001A

The **Bluesky Bluetooth hands-free car kit 1001 A** has been created to get phone calls while you are driving, keeping your hands on the steering wheel!

Easy to use, with no installation requirements, it offers the latest in Bluetooth technology with caller Id display.

This unique Bluetooth rearview mirror kit is an essential tool, which complies with the latest road safety regulations.

INNOVATING

This advanced Bluetooth technology fit up device displays the caller Id.

Its built-in rear speaker enables voice record and playback, which is highly convenient when the person you are talking to gives his contact details, for example.

The user will also enjoy the earpiece for private conversation.

EASY TO USE

Its wireless and stylish design enables an easy installation, as there is no need to modify any of the car's interior fittings.

It works with a high capacity rechargeable Li-ion battery with standby time of more than 168hrs.

SAFE

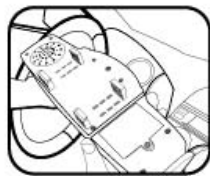

The Bluesky Bluetooth hands-free car kit 1001 A enables a safe drive while phoning.
